

# Pulley 滑輪

There are two types of pulleys, one is fixed pulley and the other is movable pulley.

- ◆ Please fill in the name of pulley and circle the correct answer(省力?費力?) and mark the direction of resistance movement(抗力移動的方向)
- ◆ The weight of the pulley(滑輪的重量) is 20 g, and the resistance(抗力) is 50 g. What is the amount of force required to pull the resistance(施力需要多少)?

( ) pulley

此滑輪省力? 費力?  
不省力也不費力?

( ) pulley

此滑輪省力? 費力?  
不省力也不費力?
