KNOWING EARTHQUAKE

- * Have you ever been in any earthquakes before?
- * How do you feel? Did anything happen in your house?

Share your experience.

WHAT CAN WE DO AT HOME 1

The Earthquake Plan

From the film, what did you learn to make your home safer from earthquakes?

Please discuss with your group and put down your answers on the whiteboard.

(1) Put fragile things in safe/stable places or hang them well.

將易碎品放置在安全的地方或是掛好。

(2) Fix shelves or closets on the wall.

將廚櫃固定在牆壁上。

(3) Everyone knows how to turn off the main power of electric and gas.

每個人都要知道電源及瓦斯的總開關的位置及使用。

(4) Ask specialists to check the cracks shown from the last earthquakes.

請專家檢視過去地震後出現龜裂。

地震!地震!地震!地震來時保命三步驟:

1. Stay away from windows.
2. Don't use the elevators.
3. If you are outside. Move away from building, trees and power lines.
4. Drop to the ground and wait until the shaking stop.
5. Prepare the Disaster Kit.
